Presentation:- How to be a Successful Failure

Everyone experiences failure. We don't like it and we see it as "A Bad Thing". This presentation explains why that is the wrong conclusion and offers a structured response to failure, drawing on the presenter's many years of experience as a successful failure.

Explore the links between success and failure, including the Failure Formulae and the Success/Failure Cycle. Discover the underlying characteristics of failure and understand the multiple dimensions of failure. True failure comes from not trying at all, giving up too soon and not learning or changing.
