Lean Six Sigma and Project Management: A Marriage Made in Heaven

Ishai Perelman

Both Lean and Six Sigma are highly useful disciplines for identifying waste and variability in processes. Lean, introduced formally during post-war Japan, is a methodology to achieve continuous flow while eliminating non value-added activities along the process.

The Six Sigma methodology, formulated by Motorola around 1986, is an analytical discipline armed with statistical tools to root out the hidden causes of problems and reduce variation, solidly supported by statistical methods.

They're both quite tactical and can achieve amazing insights in specific areas, but they only go so far since they tend to focus on single processes/problems at a time. When a business really needs to transform how it's run and make a step-change in performance, it entails taking a holistic view of the entire program, which typically consists of a portfolio of projects.

What we propose in this presentation is the amalgamation of all three components to achieve strategic results - Six Sigma to identify and reduce variability, Lean to remove non-value-added activities, and Project & Program management to obtain a structured and strategic approach across multiple projects.

When: Registration: 6.00pm - 6.30pm
 Welcome & Introduction: 6.30pm - 6.40pm
 Presentation: 6.40pm - 7.45pm

Where: 356 Holloway Road, London N7 6PA

Tel: 0207 700 0100

Costs: Attendance: Free for PMI UK Chapter members, £20.00 for non-members.

Guests: Guests are most welcome, subject to payment of entrance fee.

PDUs: Attendance at the PMI UK evening events attracts 1 PDU towards
 your PMP certification. The code for claiming the PDU is C075.YY.MM.DD under
 category 4.

Please book as soon as possible and at least one week before the event via our web site at www.pmi.org.uk. Look under Events/London then click on the "Book" icon to the right of the event title. We encourage you to attend these events to take advantage of the opportunity to network with your colleagues and learn more about this growing profession.

I look forward to seeing you there.

Jonathon Simon PMP

Chair, London Committee
PMI UK Chapter

Our Speaker - Ishai Perelman

Mr. Perelman is a professional certified Lean Six Sigma Master Black Belt with 15 years proven experience managing and deploying process excellence programs and process improvement initiatives. Ishai is also a professional projects manager and member of the PMI organization. He has an impressive record of Lean 6Sigma accelerated business transformation programs. Ishai has a holistic approach to improvement programs and always ensures that the strategic vision is clear and understood and that the tactical projects are aligned with the strategic vision. He has a practical and pragmatic approach to improvement initiatives and drives bottom line results as he is a strong advocate of clear value added deliverables with properly defined KPIs and agreed measures for success. Ishai was part of the transformation team that lead the Motorola Six Sigma program in LMPSI during the 1990's. His long dedication leading process improvements and process excellence programs won him the prestigious "Motorola CEO award" in 1997. During 2003-2004 Ishai took the role of Transformation Manager and Program managed the transformation of Plexus EMEA sites into Lean 6Sigma centers of excellence.

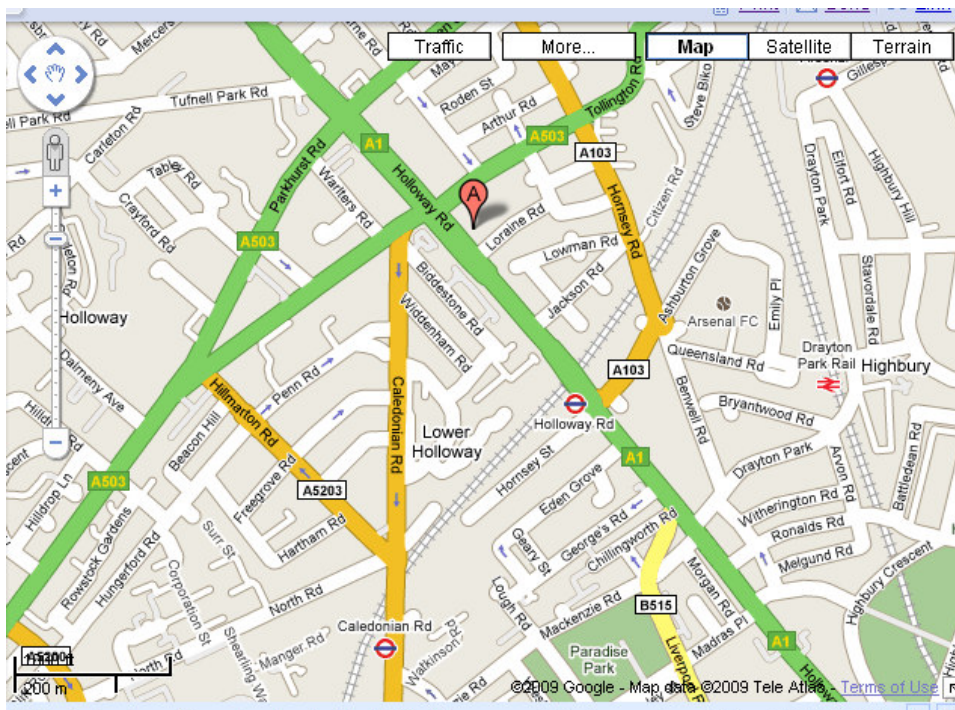

Ishai has published articles in respected journals and presented some of his works to professional peers as well as in international forums including IQPC. He is the author of the book Concurrent Technology published by the Centre of Educational Technology (Israel) in 1990.

Meet your PMI Colleagues!

Share your experience and ideas with other project management professionals at Chapter meetings. This is London's regular networking forum for Project Managers.

Interest in project management and its development as a professional discipline is growing. The Chapter meetings in London provide a great opportunity for members to express and develop their ideas with colleagues.
