Introduction to Microsoft Project 2010 – the next version

Bob Walker

Many Project Managers rely on Microsoft Project for their planning and scheduling, but we seldom have enough time to keep up to date with all the latest developments.

This is your chance to find out all the latest features and innovations on MS Project 2010 and to ask Bob all those questions about MS Project that have niggled you over 2009. Bob will be happy to take all questions, no matter how big or small and we have allocated plenty of Q&A time. At the last PMI event, the Q&A session lasted about half an hour!

This will be an excellent opportunity to raise queries with a subject expert and is a chance not to be missed.
